Autobytel Q3 2016 Results Presentation

November 3, 2016
Safe Harbor Statement and Non-GAAP Disclosures

The statements made in the accompanying conference call or contained in this presentation that are not historical facts are forward-looking statements under the federal securities laws. Words such as “anticipates,” “could,” “may,” “estimates,” “expects,” “projects,” “intends,” “pending,” “plans,” “believes,” “will” and words of similar substance, or the negative of those words, used in connection with any discussion of future operations or financial performance identify forward-looking statements. In particular, statements regarding expectations and opportunities, new product expectations and capabilities, and our outlook regarding our performance and growth are forward-looking statements. These forward-looking statements, including, that (i) the company intends to continue to develop products similar to its new lead-enhanced product solution on AutoWeb.com that the company believes will ultimately help its customers sell more cars, while making the path to purchase easier and more enjoyable for consumers; (ii) the company will continue to invest in usedcars.com in an effort to make it ‘The’ premier used vehicle destination for consumers; (iii) the company expects gross margin to continue in the mid-30% range over the next several quarters, as it invests in its core products to grow revenues and profitability; (iv) as a result of moving lead volume for approximately 190 of one of our OEM customer’s retail dealers into one comprehensive OEM program, the company expects to continue seeing a YoY decline in the company’s retail channel until the anniversary of the transition in Q2 of 2017; (v) the company plans to reinvest more going forward and to further accelerate the growth opportunities it sees in its business; (vi) the company expects its diluted share count in the fourth quarter to be around 13.5 million, and full year 2016 to be 13.4 million, contingent upon our share price and assuming current outstanding shares, warrants, options and convertible debt remain constant; (vii) the company plans to continue the investment in its products and in its development teams throughout 2017; (viii) the company expects to continue investing in its core leads business to continue to capitalize on the record level demand from its OEM and dealer customers; (ix) the company expects that the percentage of all new light vehicle retail sales in the U.S. in 2015, and of all used car sales in 2015 represented by consumers submitting leads through Autobytel’s network will grow for 2016; (x) the company continues to expect realizing more of the benefits from its new usedcars.com site in 2017; (xi) the company expects 2016 revenue to range between $153 million and $155 million, which represents an increase of approximately 15% to 16% from 2015; (xii) the company expects non-GAAP income to range between $16.5 million and $16.9 million, representing an increase of approximately 7% to 10% from 2015; (xiii) the company expects 2017 non-GAAP diluted EPS to range between $1.23 and $1.26 compared to $1.22 in 2015; and (xiv) with the launch of the new usedcars.com, the company expects to return to the originally anticipated growth levels for used cars, are not guarantees of future performance and involve assumptions and risks and uncertainties that are difficult to predict. Actual outcomes and results may differ materially from what is expressed in, or implied by, these forward-looking statements. Autobytel undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. Among the important factors that could cause actual results to differ materially from those expressed in, or implied by, the forward-looking statements are changes in general economic conditions; the financial condition of automobile manufacturers and dealers; disruptions in automobile production; changes in fuel prices; the economic impact of terrorist attacks, political revolutions or military actions; failure of our internet security measures; dealer attrition; pressure on dealer fees; increased or unexpected competition; the failure of new products and services to meet expectations; failure to retain key employees or attract and integrate new employees; actual costs and expenses exceeding charges taken by Autobytel; changes in laws and regulations; costs of legal matters, including, defending lawsuits and undertaking investigations and related matters; and other matters disclosed in Autobytel’s filings with the Securities and Exchange Commission. Investors are strongly encouraged to review the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, and other filings with the Securities and Exchange Commission for a discussion of risks and uncertainties that could affect the business, operating results, or financial condition of Autobytel and the market price of the Company’s stock.

This presentation includes non-GAAP financial measures as defined by SEC Regulation G. Autobytel’s definitions of the non-GAAP financial measures used in this presentation and reconciliations of these non-GAAP financial measures to the most directly comparable GAAP measures can be found in the appendix of this presentation. Autobytel’s management believes that these non-GAAP financial measures provide useful information to investors regarding the underlying business trends and performance of the Company’s ongoing operations and are better metrics for monitoring the Company’s performance given the effects of the Company’s net operating loss carryforwards, acquisitions and non-cash stock-based compensation. These non-GAAP financial measures are used in addition to and in conjunction with results presented in accordance with GAAP and should not be relied upon to the exclusion of GAAP financial measures. Management strongly encourages investors to review the Company’s consolidated financial statements in their entirety and to not rely on any single financial measure.

Q3 2016 Financial Summary

(vs. YoY)

- Revenues increased 9% to a Q3 record $43.9 million
- Advertising revenues increased 130% to $7.4 million
- Click revenues increased 282% to $5.5 million; up 50% sequentially from Q2
- Net Income increased 70% to $2.7 million or $0.21 per diluted share
- Non-GAAP income increased 26% to $6.5 million or $0.49 per diluted share
Quarterly Revenue

- Retail Dealer Automotive
- OEM/Wholesale Automotive
- Specialty Finance
- Website Advertising

**Revenue ($M)**

- Q3’13: 21.6
- Q4’13: 20.7
- Q1’14: 27.0
- Q2’14: 25.9
- Q3’14: 27.4
- Q4’14: 26.0
- Q1’15: 26.2
- Q2’15: 30.4
- Q3’15: 40.2
- Q4’15: 36.4
- Q1’16: 36.2
- Q2’16: 36.1
- Q3’16: 43.9

**Advertising:** Up 130% YoY due to increases in display and other advertising, as well as significant increase in click revenues

**Wholesale:** Up 6% YoY on OEM/Wholesale demand, as well as benefit from the transition of 190 retail dealers to a comprehensive OEM wholesale program

**Retail:** Decreased YoY due to systematic reduction of low quality volume and OEM/wholesale program transition
Click Product Continues to Accelerate

Click Revenue (millions)

- Q3 click revenues up 282% YoY, reflecting significant volume growth and expanding revenue per click.

- Launched beta version of new lead-enhanced lead product on Autoweb.com.

1) Acquired AutoWeb October 1, 2015.

The above financials are impacted by rounding to the nearest $0.1M.

1) Non-GAAP Income is equal to net income/(loss) plus amortization of acquired intangibles, non-cash stock compensation, income taxes, gain on investment, severance costs and acquisition related expenses, plus litigation settlements. See appendix for reconciliation.

2) Non-GAAP EPS is non-GAAP income divided by weighted average diluted shares outstanding. See appendix for reconciliation.

$32.7 Million in Cash, $139.6 Million in Net Operating Loss Carryforwards
Autobytel Leads Drive Car Sales

- Consumers submitting leads via Autobytel network accounted for 2.5 million+ new retail sales from 2011-2015
  - This represents an **average of ~4% of all U.S. Light Vehicle New Retail Sales from 2011-2015**
  - **Increased to ~5% of U.S. LV New Retail Sales for 2015**
- Consumers submitting leads via Autobytel network accounted for an **average of ~2% of all U.S. used car sales from 2011-2015**
- Consistent growth despite minimal investment in the used car business from 2011-2014

Autobytel Consumers Accounted for ~5% of Annual US LV New Retail Sales
**High Buy Rates with Validated Attribution**

- **We provide buy rates**, derived from IHS Automotive data\(^1\), that estimate how many consumers who submitted leads through the Autobytel network convert to purchases, or how many leads were lost to other dealers.

- **Most competitors rely only on feedback from dealers/manufacturers** with minimal attribution.

- **Buy rate information provides the ability to drive pricing with dealers**, as well as incremental lead volume.

- Internally generated leads account for ~80% of leads sold by Autobytel.

---

**IHS Automotive Lead Conversion Data\(^2\)**

(Consumers who Submitted a New Vehicle Lead & Bought New)

- Internally-generated Autobytel leads have a buy rate of 17% to 27% — significantly higher than those we source from 3rd parties or purchase from our competitors.

1) Guidance updated and effective only on November 3, 2016.
2) Non-GAAP Income and Non-GAAP EPS are defined as net income, plus amortization of acquired intangibles, non-cash stock compensation, income taxes, gain on investment, severance costs and acquisition related expenses, plus litigation settlements, divided by weighted average diluted shares outstanding. The company has not provided a reconciliation of its 2016 non-GAAP diluted EPS guidance to the most directly comparable GAAP financial measure because the effect, timing and potential significance of the effects of tax considerations, primarily related to the company’s net operating loss carryforwards, are out of the company’s control and/or cannot be reasonably predicted. Consequently, a reconciliation to the corresponding GAAP financial measure is not available without unreasonable effort.

About Autobytel Inc.
Autobytel Inc. provides high quality consumer leads and associated marketing services to automotive dealers and manufacturers throughout the United States. The company also provides consumers with robust and original online automotive content to help them make informed car-buying decisions.

The company pioneered the automotive Internet in 1995 with its flagship website www.autobytel.com, and has since helped tens of millions of automotive consumers research vehicles; connected thousands of dealers nationwide with motivated car buyers; and has helped every major automaker market its brand online. Investors and other interested parties can receive Autobytel news alerts and special event invitations by accessing the online registration form at investor.autobytel.com/alerts.cfm.

- Ancillary Products & Investments
High ROI for Dealers

- Given Autobytel’s high conversion rates, our cost per lead model provides a favorable ROI for dealers.
- The higher the conversion rate, the greater the price disparity.
- Historical average close rate in auto industry is 6-8%.
  - **Autobytel estimated buy rate is 17-27%**
- Autobytel cost to dealer represents about half of all dealers’ normal marketing expense at $608\(^1\)

---

1) National Automobile Dealer Association (NADA), 2014.
2) Calculated with an average cost of $22 per lead.
